Sandman Professional Topdressing Sand & Soil Amendment

Start a tradition on your turf and garden areas with Sandman Professional Topdressing Sand & Soil Amendment.

Sandman Professional Topdressing Sand & Soil Amendment featuring EARTH Food® is unlike any other soil amendments and synthetic fertilizers - it is

rich in organic matter and nutrients containing microorganisms - the basis for plant growth and animal life.

Sandman Professional Topdressing Sand & Soil Amendment blended with EARTH Food® is environmentally friendly - preserving, purifying and restoring soil and water resources. Because organic matter enhances water and nutrient-holding capacity and improves soil structure, Sandman Professional Topdressing Sand & Soil Amendment can reduce the severity and costs of natural phenomena such as drought and disease.

Mix in existing soil to enhance plant growth or apply

surface.

Improves drainage

Creates vital nutrients and reduces thatch

Smooths turf for better cutting & maintenance

Stimulates stronger, healthier root growth

Planting Beds

use soil amendments to a depth of 8" to 10" to improve the hard packed clay soil profile for flowers and other planting beds.

Topdressing

incorporates a blend of sand, soils & organic materials into the turf, to help create a healthy medium for root growth and a smoother turf

Sandman Professional Topdressing Sand & Soil Amendment is a blend containing EARTH Food® and clean, washed USGA® approved sand that meets USGA® specifications as a Root Zone mix for golf greens - improving the physical, chemical and biological properties of all soil types...

ERTH Food® is a professional blend of organic composted material that will improve the physical, biological and chemical characteristics of the soil. EARTH Food® professional root zone mixes produce deep root structure that is superior to peat and other products.

Microbial activity is key to a healthy turf lawn, putting green or bedding plants. EARTH Food® professional root zone mixes provide the proper balance of water, oxygen and organic matter along with the essential nutrients and microbes required for healthy, long lasting turf and plants.

ERTH Food® supplies the food energy that increases the number of microbes found in the soil as well as provides the basic nutrients need for healthy plant growth improving overall turf and plant quality. Soil bacteria in compost is the organic fiber in the soil that converts nutrients to a form the plant can assimilate. The microorganism properties of EARTH Food® also assists in plant disease suppression.

ERTH Food® contains the proper balance of humus and humic acids to buffer salts, aerify the
